

I want to pursue for Taught Master's Course in Management Studies to get an exposure to advanced general management knowledge and to build my leadership skills. This course gives an exposure to subjects like Accounting, Economics, Finance, Marketing, Strategic Management, Operations Management and Human Resources which are very important to build a strong foundation in business concepts and commercial awareness and is very much required by all the organizations. Having worked in different fields like Mining, Power-Generation and Non-Governmental Organization as an intern and as a full-time employee at a financial software product company for 1.5 years, I can relate the managements concepts well with the real-time situations as well as learn its applications quickly.

Course in Management opens opportunities in consultancies, financial firms and many other firms with requirement of Management. After this course, my short term goal would be join consultancy firm and later to return to my country to work for helping small and medium scale industries meet their challenges with my knowledge and experience. I believe that this course will equip me better for this.

The institutes which I have selected are not only amongst the best in the world for my course but also offers a unique opportunity to interact with people with diverse background. In the age of globalization, it is crucial to have a broad and refined international outlook which these institutes would help me attain. These institutes are also known for the experienced and earned professor that would be a great source of knowledge and inspiration.

Studying in UK will not only help me in getting a world class education and would be a door to my dream career, but it would also be an opportunity to discovers its unique culture, cities and countryside-from music to sport to heritage and an opportunity to live in a cosmopolitan culure that will help me in all-round learning experience
